EDGARD SP Z O.O.

ul. Belgijska 11

02-511, Warszawa

I would like to truly recommend the highest-level services of Mobile Reality. In the last two months, our company has cooperated with Mobile Reality on many different tasks related to the Multisłówka app. The company offers high-quality Android development and has delivered each stage of the project on time which is crucial for an effective cooperation. We can say that we have always been satisfied with their work.

I would like to highlight the following tasks:

- actualization of old libraries,
- reducing the number of bugs in Android application,
- creating 100% ready for the new technology solutions,

which have been delivered before the deadline and, what is more important, based on the previously discussed and planned scope.

I strongly recommend their services and I am looking forward to working with Mobile Reality again for future IT and mobile applications projects.

Sincerely,  
Paweł Radliński

Product Development Specialist
